Home treatment: Good successes with psychiatric diseases in children & adolescents through home treatment

 19. Januar 2021  [English Press Releases](#)

Austrian Institute for Health Technology Assessment (AIHTA) publishes study on international experience and provides recommendations for Austria

Vienna (Austria), 19. January 2021: The treatment of psychiatric diseases of children and adolescents in their own homes (home treatment) is used successfully internationally and could also be established in Austria if important recommendations are taken into account. These are the core statements of a recently published study by the Austrian Institute for Health Technology Assessment (AIHTA). In this study, 6 international models from 4
